

Aweber Shared Funnel Instructions | \$5 Profit Funnel

Easy & Free Landing Pages

Over the years, I've offered a variety of page templates and assets of all kinds to students.

These are often things that I am currently using in my business, and so, they typically come in the form that I have in the wild.

In this package, however, I'm going to try something different.

I've re-created my funnels in Aweber, which has a landing page sharing link system that I think is PERFECT for the side-hustle budget.

Aweber is free for your first 500 contacts. And while you can only run one of these funnels for free, you can import them all and move between them.

PRO TIP: You will eventually want to get a paid Aweber.com account, since you get unlimited lists and pages.

Nevertheless, this method will be the easiest page you've ever deployed and you don't even need a webhost.

Steps:

1. Simply create a free www.Aweber.com account
2. Sign-in and setup your email account
3. Click the share links in this document to install the funnels to your account.
4. Setup your emails with the templates provided for your chosen (offers)
5. Start promoting your funnels!

You can find the share links to the funnels on the next page of this guide!

Once installed, follow the main training instructions to implement these profit funnels.
